

Aztec IT Ltd

Aztec Information Technology offer fast, friendly and professional computer and IT support services including technical computer support and network support services.

Based in Essex UK, we provide dedicated network support and IT support services for companies with up to 250 users; offering a full remote and on-site presence.

Aztec Information Technology offers contract and ad-hoc computer and IT support services with levels to suit a variety of needs, requirements and budgets.

IT support services offered by the company include, but are not restricted to the following:

- Computer Support
- Licensing
- VoIP
- TeleWorking Solutions
- Web Design
- Network Support
- Network Design
- Security

- DSL Installations
- Virus removal and prevention
- Networking Policies
- Active Directory

Affiliated and experienced with many of the key suppliers and manufacturers such as AVG, Symantec, cisco, Draytek, McAfee, Watchguard, ACT, Sage and Veritas. Aztec IT aims to provide the right solution for each customer.

As Microsoft Partners, and specialising in Small Business, all Aztec IT engineers are qualified to work on all server products from Small Business Server through to clustering multiple servers for zero downtime solutions, from changing desktop wallpaper to full site wide network design, security and migrations. Aztec IT have the skills and the experience to suit your needs.

Aztec IT offer a full pre-sales service including a free Audit solution*; we will assist you in the decision making process giving you options and advice to build a solution tailored for your needs. With a Full Design and Installation service we will produce a bespoke design and install both defining and designing the network to suit your organizational needs. All for a lot less than you might think. On average under our fixed price support contract, the use of one of our support team's costs less than a 1/3rd of the cost of one full time IT support staff.

This represents a substantial saving for you. In addition it removes the need for you to concentrate on the IT support, allowing your staff to carry out the roles that you have employed them to do.

Our consultants have worked in every technological area of IT, including:

- Design
- Support
- Consultancy
- Out-sourcing
- National and international consulting
- Office relocations
- Call centre design and setup
- Convergence
- VoIP
- Disaster recovery
- Project management
- Network troubleshooting
- Remote working
- Auditing
- Migrations

Common industries covered include Financial Institutions, Legal Practices, Manufacturing Companies, Construction Houses and many other areas. We are your one-stop solution to making your technology work for you.
